ENG-4.1 Capital Improvement Program Policy

4.1.1 Capital Improvement Program

A capital improvement plan will be prepared, implemented and maintained to be used as a planning tool to assist the District in construction and replacement of capital facilities require to provide water service to current and future customers.

4.1.2 Performance and Design Criteria

The Board of Directors has adopted target criteria for use in the design and construction of water facilities. This is target criteria, and is not an assurance or guarantee of specific service levels at any specific location. Although the Board will strive to meet the target criteria, situations may arise where the Board may make decisions that do not result in meeting the target criteria.
