AARP.TheHartford.com

FOLSOM, CA - In light of dire water forecasts from federal and state water agencies, more valley communities are imposing stricter water use policies.

The city of Folsom elevated its Stage 2 Water Alert to a Stage 3. That means landscape watering will only be allowed on a designated, two-day a week schedule and only between 10 p.m. and 10 a.m.

The use of free-flowing hoses without control valves is prohibited.

Except for health, sanitation or fire protection services, there is to be no washing of driveways, sidewalks, streets, buildings or other hardscape surfaces.

Specifics on the restrictions is posted [here](#).

First-time violators face a personal or written warning. Second and subsequent violations incur the possible discontinuation of water service, fines and the mandator installation of a water meter.

San Juan Family of Water Agencies

The San Juan, Citrus Heights, Fair Oaks water districts and Orange Vale Water Company on Wednesday announced a 20 percent water reduction request to their combined 265,000 users.

The move was made to help preserve surface water supplies. The districts receive water from Folsom Lake which is currently at just 30 percent capacity.

Last week the city of Roseville ordered a [Stage 2 Drought Level](#).

Water-Saving Tips

1. Install ultra-low-flush or high-efficiency toilets (save up to 650 gallons per month)
2. Install a low-flow showerhead (save up to 800 gallons per month)
3. Turn off the tap while brushing your teeth (save up to 10 gallons per day)
4. Use a high-efficiency washing machine (save more than 16 gallons per load)
5. Repair a leaky faucet (save up to 430 gallons per month)
6. Install a low-flow faucet aerator (save more than 140 gallons per month)
7. Fix toilet leaks (save up to 500 gallons of water per day)
8. Locate water shut-off valves (could save hundreds of gallons of water if a pipe bursts)
9. Run dishwashers and washing machines only when full
10. Limit showers to 10 minutes or less
11. Complete outdoor watering between midnight and noon when less water is lost due to heat and evaporation
12. Install an evapotranspiration (ET) or weather-based irrigation controller to increase outdoor water efficiency
13. Check your irrigation system for leaks, clogs or misdirected sprinklers and emitters; fix what's broken
14. Avoid outdoor watering on windy days since some water will blow away
15. Utilize rotor sprinklers to ensure even water distribution (rotor and impact sprinklers should never be mixed in the same zone)
16. Split irrigation into two shorter cycles allowing water to penetrate the soil and reduce runoff
17. Use a broom instead of the water hose for cleaning sidewalks and driveways
18. Apply mulch to plants and shrubs to keep soil cool and reduce water evaporation
