Engineering Services Manager Position Description

Status: FLSA Exempt
Supervisor: Retail Operations Manager
Effective Date: July 1, 2007

Supervision Received and Exercised

Receives general direction from the Retail Operations Manager and exercises direct supervision over technical personnel and oversees the work of outside consultants.

Primary Function

To plan, organize, direct and supervise engineering operations, functions and related projects; and to perform a variety of technical tasks relative to assigned area of responsibility.

Essential Duties - Duties may include, but are not limited to, the following:

- Recommend and assist in the implementation of goals and objectives; establish schedules and methods for design, planning, construction and inspection, and capital improvement projects; implement policies and procedures.
- Plan, prioritize, supervise and review the work of staff involved in engineering design, and construction and inspection.
- Evaluate operations and activities of assigned responsibilities; recommend improvements and modifications; prepare various reports on operations and activities.
- Participate in budget preparation and administration; prepare cost estimates for budget recommendations; submit justifications for equipment, materials and supplies.
- Participate in the selection of staff; provide or coordinate staff training; work with employees to correct deficiencies; implement discipline procedures.
- Coordinate design and specification preparation for the District's capital improvement program; review for constructability.
- Oversee the bid process including preconstruction conference and contract awards for District construction projects; review daily inspection reports; participate in pre-final walk through; review punch list prepared by inspector; coordinate turnover of pipeline or facility to user department.
- Manage all new residential and commercial development through final acceptance; initiate job close out; approve final costs for project; coordinate land and right-of-way acquisition.
- Oversee construction management for new water system construction; act as point of contact for developers, engineers and customers requiring water service or line extensions; coordinate plan check by engineering personnel for developer contributed improvements; approve and sign drawings as District agent.
- Review bond estimates; offer recommendations to General Manager for agreements; coordinate District acquisition and financing of developer installed facilities; initiate resolution of acceptance of developer construction; review maintenance bonding and releases upon guaranty expiration.

- Ensure receipt of as-built drawings; direct the preparation of as-built drawings, water system maps, and easements; maintain production and consumption records; calculate capacities for storage, fire flows, and line losses.
- Review applications for water service and pipeline extensions; direct water system improvement design including pipeline replacement, pressure reducing stations, and system modifications.
- Develop and maintain the District's hydraulic model including field testing and calibration.
- Direct GIS infrastructure management and development; maintain and interpret corrosion control test information for system protection.
- Answer questions and provide information to the public; investigate complaints and recommend corrective action as necessary to resolve complaints.
- Build and maintain positive working relationships with co-workers, other District employees and the public using principles of good customer service.
- Perform related duties as assigned.

Minimum Qualifications

Knowledge of:

- Principles and practices of civil engineering, design, and construction and maintenance requirements of water system facilities including the strength, properties and use of engineering construction materials.
- Engineering mathematics.
- Principles and practices of supervision, training and performance evaluations.
- Principles and practices of budget monitoring.
- Principles and practices of safety management.
- Pertinent local, State and Federal laws, ordinances and rules.
- Principles and practices of customer service.
- Modern office procedures, methods and computer equipment.

Ability to:

- Organize, implement and direct engineering activities.
- On a continuous basis, know and understand all aspects of the job; intermittently analyze work papers, reports and special projects; identify and interpret technical and numerical information; observe and problem solve operational and technical policy and procedures.
- On a continuous basis, sit at desk for long periods of time; intermittently twist to reach equipment surrounding desk; perform simple grasping and fine manipulation; use telephone, and write or use a keyboard to communicate through written means.
- Interpret and apply District, State and Federal policies, procedures, rules and regulations.
- Assist in the development and monitoring of an assigned program budget.
- Prepare comprehensive technical reports and recommendations.
- Develop and recommend policies and procedures related to assigned operations.
- Read and comprehend blueprints and engineering sketches.
- Establish and maintain effective working relationships with those contacted in the course of work.
- Work effectively under time deadlines and within limited financial and staffing resources.
- Proficiently use computers and applicable software.
- Address difficult issues by building consensus and developing appropriate resolutions.
- Communicate clearly and concisely, both orally and in writing.
- Supervise, train and evaluate assigned staff.

Education and Experience:

Any combination of training, education, and experience that has led to the acquisition of the knowledge, skills, and abilities as indicated above. A typical qualifying entrance background is:

Education:

Equivalent to a Bachelor's Degree from an accredited college or university with major course work in engineering.

Experience:

Eight years of progressively responsible professional engineering experience including project management responsibility.

License or Certificate:

Possession of, or the ability to obtain and maintain, a California Driver's License with a satisfactory driving record. Individuals who do not meet this requirement due to a physical disability will be considered on a case-by-case basis.

Registration as a Professional Engineer with the State of California.

Physical Capabilities:

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform functions.
