Get Gardening and Irrigation Questions Answered Every Friday at San Juan Water District's WEL Garden

Granite Bay, Calif. – Beginning this week, a San Juan conservation technician will be available in the Water Efficient Landscape (WEL) garden to answer irrigation questions and provide gardening tips every Friday, from 1-4 p.m. San Juan invites curious customers and seasoned gardeners to come with questions about pruning, irrigation techniques, plant selection and more!

“Landscape irrigation accounts for 70 percent of customer water use in the summer,” said Shauna Lorange, San Juan general manager. “That’s why we offer our customers free workshops and rebates so they can reduce their water use and save money on their water bills.”

The WEL Garden is used to demonstrate how to conserve water, while still maintaining a stunning and unique landscape. Located at the San Juan Water District offices, the Garden is open for self guided tours every Monday through Friday; from 8:30 a.m. to 4:30 p.m. Stop by the front office before starting your tour.

San Juan Water District is a community services district that provides drinking water to more than 265,000 people in portions of Sacramento and Placer counties. In addition to serving retail customers in Granite Bay, east Roseville, and the northeast portion of Sacramento County, the district wholesales water to Citrus Heights and Fair Oaks water districts, Orange Vale Water Company and the city of Folsom (north of the American River) and periodically to Sacramento Suburban Water District.
